Large 20mm LED beacon

Vandal resistant call button

Activation delay

Stainless steel faceplate

Anti-tamper fixings

Flush or surface mount in 35 mm double gang back box

CELL CALL SYSTEMS

Our custodial cell call system comprises a range of tough reliable NOMS STD/E/SPEC/013 units for use in Prisons, Magistrates' Courts, Police Custody Suites and similar establishments.

The cell call range includes all of the units described in the NOMS specification including Cell Call Units, Corridor Reset Units, Landing Indicator Units, Wing Office Display Units, PSUs and event log file servers.

We also offer disabled cell and 'safer cell' options including Samaritan Call, alarm strips and panic buttons.

CELL CALL UNITS (CCUS)

Cell call units (CCUs) are usually located inside cells and are used to call for assistance. They usually operate in conjunction with corridor reset units (CRUs) located outside the cell which have a beacon to indicate the source of the alarm. Cell call units may have additional features e.g. intercom and lights controls.

CC 9004-108 STANDARD CELL CALL UNIT

Our CC 9004-108 Standard Cell Call Unit combines a call button and large reassurance LED into a vandal resistant stainless steel unit. The standard unit is annotated in black with the word **CALL**; alternative annotation is available on request.

MOUNTING

These units can be mounted in double gang 35mm flush or surface mount back boxes (not supplied).

REASSURANCE LED

The LED is illuminated when the cell call is activated to provide user reassurance.

ACTIVATION DELAY

The call button must be held for at least 0.25 seconds to reduce the risk of accidental calls.

APPLICATION

Suitable for use with Folknoll Cell Call, Combined Custodial and Police Custody Suite Systems
