- Bright yellow die cast aluminium fascia
- Black die cast aluminium back box
- Integral speaker and microphone, high audio output (85dB)
- Large call button, progress LED
- Can be used with compact or standard systems

DESCRIPTION

The Disabled Refuge EVC series is a range of easy to install, easy to configure and easy to operate BS5839-9 compliant equipment, designed to enable you and your clients to install BS5839-9 compliant vandal resistant disabled refuge EVC systems of up to 20 outstations.

The single button external outstation is a vandal resistant IP65 bright yellow and black die cast aluminium outstation designed for external use. The unit has an integral microphone and speaker and is fitted with large vandal resistant call button and a call progress. Speaker and microphone volume are adjustable to suite the operating environment with a maximum output of 85dB for noisy areas. The unit is usually mounted in the refuge area and is used by refugees to communicate with the system operator in the event of an emergency. This unit is annotated in black with the words "PRESS ONCE TO CALL", alternative annotation is available on request. The unit is supplied with a surface mount back box. This unit can be used with compact or standard Folknoll Disabled Refuge EVC systems.

CONNECTIONS

Outstation

DESIGNED FOR LIFE

At Folknoll all equipment is designed by experience engineers for ease of installation and operation. In particular the designers of Folknoll Disabled Refuge EVC systems have taken into account the BS requirement to use larger fire resistant cabling, providing cable termination within enclosures, allowing room for larger glands and avoiding the need for additional junction boxes.

CUSTOM UNITS

Folknoll is a customer focused company. If you need special software features, custom made units or larger systems, then please contact Folknoll to discuss your requirements.
