- Range of beacon/sounder annunciator units
- Reset inside toilet
- Activation delay to reduce risk of accidental activation
- Remote monitoring of up to 16-off toilets
- Outputs for BMS and additional equipment
- Battery backed operation

DESCRIPTION

The disabled toilets alarm series is a range of easy to install and easy to operate equipment, designed to enable you and your clients to install vandal resistant disabled toilets alarm systems.

TOILETS

Depending on chosen options users activate alarms by pulling ceiling pull cords or pressing emergency call buttons. To reduce the risk of accidental alarm activation users must pull a ceiling cord or press the emergency call button for a minimum of 0.25 seconds to trigger an alarm.

Activated alarms are annunciated by local beacons and sounders. After responding to the users call for help the alarm is reset by pressing the local reset button.

REMOTE MONITORING FROM REFUGE MASTER STATION

For locations that require remote monitoring, Folknoll offer their remotely monitored disabled toilets alarm systems. Up to 16-off toilets can be monitored from a remote indicator panel built into a fire panel sized Disabled Refuge EVC master station.

The system alarm status is displayed on one or more networked remote indicator panels or master stations. In the event of alarm activation each remote indicator panel emits an audible tone and displays a custom message identifying the source of the alarm.

The system is usually powered from a single battery backed power supply to ensure continued operation in the event of a mains supply failure.

NOTE: Folknoll disabled toilets alarm systems can only be reset by pressing the reset button on the stand-alone toilet system. Operators are required to visit an activated disabled toilet system to cancel an alarm.

DESIGNED FOR LIFE

At Folknoll all equipment is designed by experience engineers for easy installation, simple configuration, straightforward operation, low maintenance and high reliability.

CUSTOM UNITS

Folknoll is a customer focused company. If you need special software features, custom made units or larger systems, then please contact Folknoll to discuss your requirements.
