Compatible with remote monitoring systems

IP/serial/digital BMS interfaces available

**CUSTOMISED PANELS AVAILABLE ON REQUEST**

## FOR DISABLED TOILET ALARMS

### FOLKNOLL DISABLED TOILET ALARM SYSTEMS

Our disabled toilet alarm series is a range of flexible, easy to install and operate equipment, enabling you to install cost effective vandal resistant disabled toilet alarm systems. Using this range you can construct anything from stand-alone toilet alarms to site-wide systems with remote fault monitoring, events logs, graphical workstations etc.

#### DT7540.51 BEACON SOUNDER RESET

The DT7540.51 combines the functions of alarm beacon, alarm sounder and alarm reset into a single vandal resistant stainless steel unit.

These units are usually mounted on the wall outside the toilet to attract attention in the event of an alarm and to allow staff access to reset alarms.

The large LED protrudes from the surface and can be seen from the side (ideal for corridors etc.).

The reset switch is keyed to prevent operation by unauthorised persons.

This standard unit is annotated in black with the words **ASSISTANCE REQUIRED RESET**; alternative annotation is available on request.

These units can be mounted in double gang 35mm flush or surface back boxes (not supplied).

**FOLKNOLL DISABLED TOILETS ALARMS CANNOT BE RESET REMOTELY  
ENSURING OPERATORS VISIT THE TOILET AREA IN RESPONSE TO AN ALARM.**

## PART NUMBERS

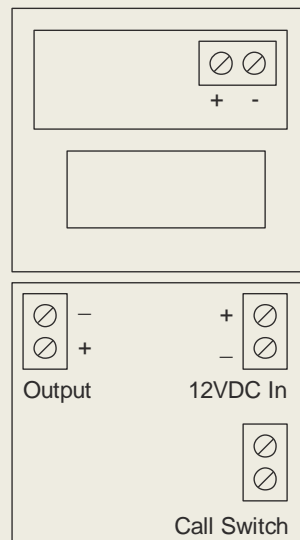

DT7540.51 Beacon sounder reset unit, vertical, stainless steel
