

### FEATURES

- 20m LED beacon
- Integral sounder
- Vandal resistant button or keyed reset switch
- Can be flush or surface mounted in 35mm double gang back box (not supplied)

### DESCRIPTION

The disabled toilets alarm series is a range of easy to install and easy to operate equipment, designed to enable you and your clients to install vandal resistant disabled toilets alarm systems.

Beacon sounder reset units combine the functions of alarm beacon, alarm sounder and reset unit into a single unit.

These units are usually mounted on the wall outside the toilet to attract attention in the event of an alarm and to allow operator access to reset alarms.

These units are usually supplied with vandal resistant call buttons but can be supplied with keyed reset switches to prevent reset by unauthorised persons.

Reset button/switch must be held for at least 0.25 seconds to reduce the risk of an accidental alarm reset.

This standard unit is annotated in black with the words **ASSISTANCE REQUIRED RESET**; alternative annotation is available on request.

These units can be mounted in double gang 35mm flush or surface mount back boxes (not supplied).  
(not supplied).

#### PART NUMBERS

DT7540.51 Beacon sounder reset unit, stainless steel
