FOR DISABLED TOILET ALARMS

FOLKNOLL DISABLED TOILET ALARM SYSTEMS

Our disabled toilet alarm series is a range of flexible, easy to install and operate equipment, enabling you to install cost effective vandal resistant disabled toilet alarm systems. Using this range you can construct anything from stand-alone toilet alarms to site-wide systems with remote fault monitoring, events logs, graphical workstations etc.

DT7540.02M RESET MONITORED STAINLESS

The DT7540.02M is a vandal resistant disabled toilet alarm reset unit with alarm activated LED and optional fault monitoring.

Reset units are installed in the toilet area to enable staff to reset activated alarms.

FOLKNOLL DISABLED TOILETS ALARMS CANNOT BE RESET REMOTELY ENSURING OPERATORS VISIT THE TOILET AREA IN RESPONSE TO AN ALARM.

The standard unit is fitted with a vandal resistant reset button. Keyed reset switches to prevent unauthorised resets can be supplied on request.

The alarm activated LED illuminates to indicate which reset is required.

Reset buttons or keyed switches must be held for at least 0.25 seconds to reduce the risk of an accidental alarm reset.

Monitored reset units have a fault output for use with monitored control systems.

The face plate is made from brush finished stainless steel and is annotated in black with the word **RESET**. Other finishes and alternative annotation are available on request.

These units can be mounted in flush or surface 35 mm single gang back boxes (not supplied).

PART NUMBERS

DT7540.02M Disabled Toilet Alarm Reset Monitored Stainless
