FOR DISABLED TOILET SYSTEMS

FOLKNOLL DISABLED TOILET ALARM SYSTEMS

Our disabled toilet alarm series is a range of flexible, easy to install and operate equipment, enabling you to install cost effective vandal resistant disabled toilet alarm systems. Using this range you can construct anything from stand-alone toilet alarms to site-wide systems with remote fault monitoring, events logs, graphical workstations etc.

DT 7800-122 BEACON SOUNDER VERTICAL BLACK

The DT 7800-122 is a combined beacon and sounder in a single gang unit with a vandal resistant black painted steel plate.

Beacon sounder units are usually mounted on a wall outside of the toilet to attract attention in the event of alarm activation. The LED beacon is dome shaped and can be seen from the side. Ideal for corridors etc.

This unit is suitable for use in stand-alone and remotely monitored systems, including our plan based graphical workstation systems for larger complexes. Third party interfaces are also available on request.

The black painted steel faceplate is annotated in white with the words **ASSISTANCE REQUIRED**. Other finishes and alternative annotation are available on request.

The beacon sounder unit can be mounted in flush or surface 35 mm single gang back boxes (not supplied).

Folknoll equipment can be customised to suit your application. Alternative annotation and panel designs are available on request.

PART NUMBERS

DT 7800-122

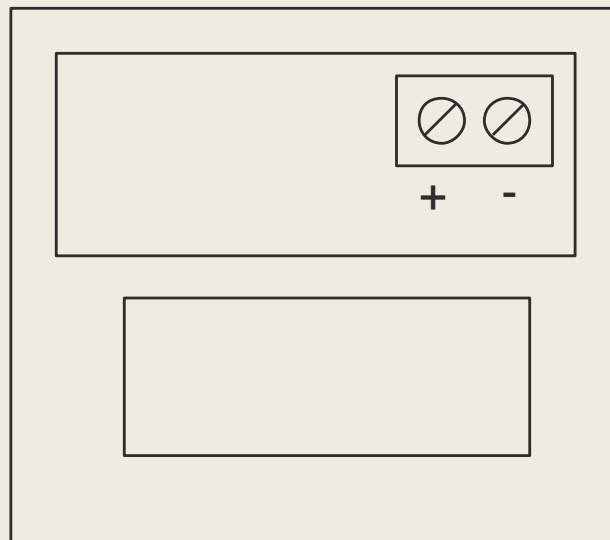

Disabled Toilet Alarm Beacon Sounder Vertical Black
