- Vandal resistant alarm call point
- Illuminated call button with activation delay
- Stainless steel faceplate
- Anti-tamper fixings available
- Mounts in flush or surface single gang back box
- Output for Folknoll remote monitoring systems

DISABLED TOILET ALARMS

Folknoll's vandal resistant BS8300 compliant disabled toilet alarm system provides cost effective solutions built from standard and bespoke units. Our toilet alarms can be combined with disabled refuge EVC, fire telephone and other systems. Ideal for shops, offices, hotels and other public spaces.

DT7520.20F CALL POINT BUTTON

A Folknoll call point activates the disabled toilet alarm. One or more call points are usually installed in conjunction with pulls cords and alarm strips to enable a user to call for assistance in the event of an emergency.

The DT7520.20F Call Point Button offers an vandal resistant call point with illuminated call button. The faceplate is made from brush finished stainless steel and annotated in black with the word **CALL**. Other finishes and alternative annotation is available on request. This unit can be mounted in a 35 mm flush or surface single gang back box (not supplied).

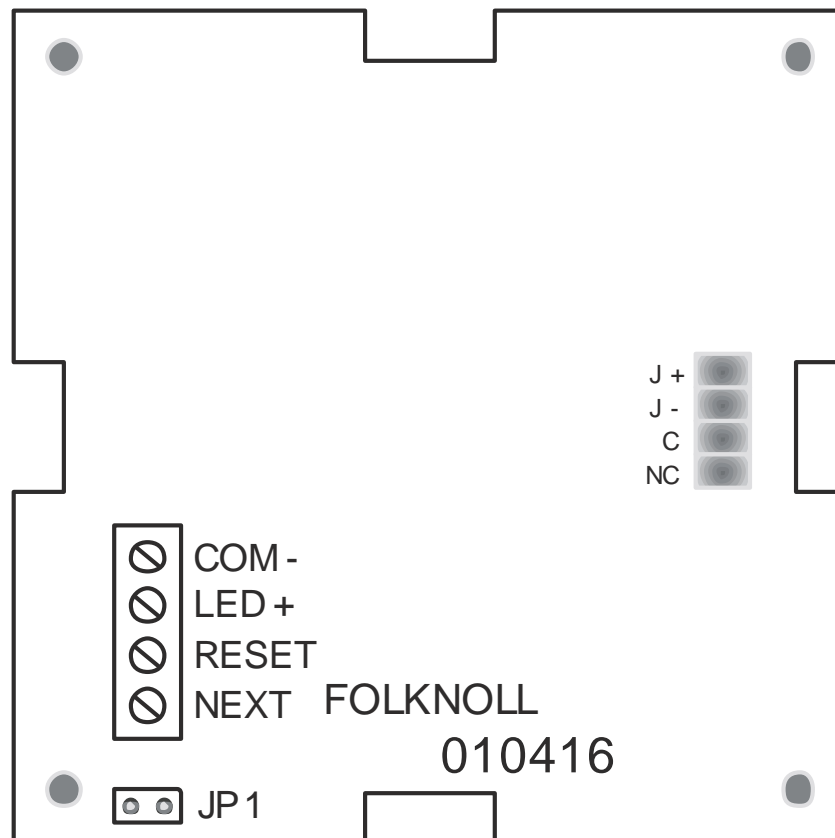

ILLUMINATED CALL BUTTON

The reset button activates the alarm. To reduce the risk of accidental alarm activation the button must be held for a minimum of 0.25 seconds. On alarm activation the button illuminates giving a visible indication of alarm activation inside the toilet.
