- Can be mounted in 25 mm flush or surface double gang back boxes
- Suitable for use in public areas

DISABLED TOILET ALARM

Our vandal resistant BS8300 compliant disabled toilet alarm system provides cost effective solutions built from standard and bespoke units. We offer stand-alone toilet alarms, multiple toilet alarms with remote monitoring and combined systems with disabled refuge EVC, fire telephone, building alarms, etc. Interfaces for BMS and transmission over IP are available. Ideal for shops, offices, hotels, factories and similar locations.

DT7550.04 LED INDICATOR 4-ZONE

LED indicator panels provide a cost-effective alternative to 'intelligent' LCD indicator panels.

The DT7550.04 LED Indicator 4-Zone monitors and annunciates alarms from up to 4-off toilets.

The indicator panel is fitted with a sounder to alert staff and 4-off dome LEDs to indicate alarm source. Dome LEDs can be seen from the side and are suitable for use in corridors and other locations where the unit may not be approached or observed from the front.

The standard faceplate is annotated in black with the words **ZONES 1 2 3 4**. Alternative annotation is available on request.

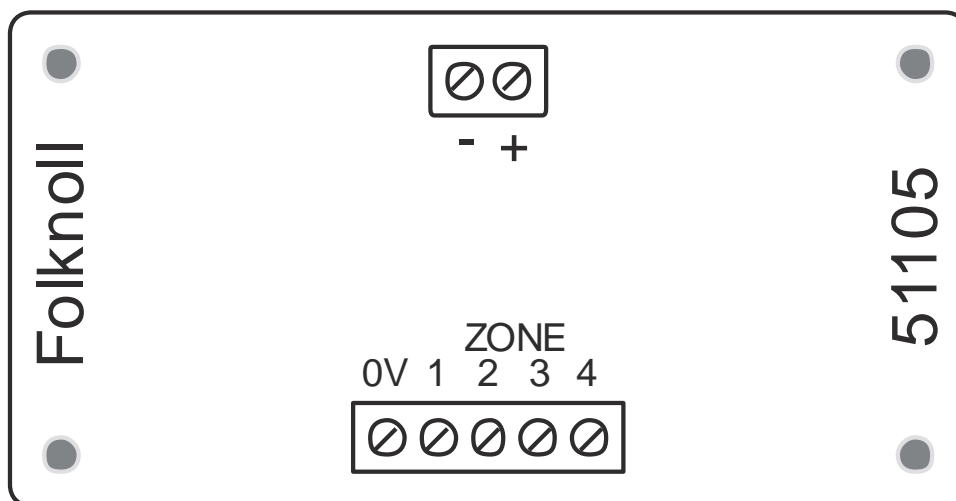

This panel can be mounted in 25 mm flush or surface double gang back boxes.
