

DT 7800-212 NIOS PC WORKSTATION

- Network alarm monitoring
- Plan based user friendly GUI
- Alarm tones to alert operators
- On-screen indication of alarm source
- Acknowledge / accept function
- Fault monitoring
- Easy configuration
- BMS data output
- Ideal for remote monitoring in large sites
- Compatible with disabled toilet alarms

DISABLED TOILET ALARMS

Our vandal resistant BS8300:2009 compliant disabled toilet alarm system provides cost-effective solutions built from standard and bespoke units. Our toilet alarms can be combined with disabled refuge EVC, fire telephone and other systems. Ideal for shops, offices, hotels and other public spaces.

DT 7800-212 NIOS PC WORKSTATION

Our DT 7800-212 NIOS PC Workstation enables operators to monitor remote disabled toilet system alarms and faults over standard IP networks.

ALERTS: The workstation alerts operators to alarms by generating a warning tone. The source of the alarm is indicated on a site plan, enabling a speedy response to activations.

ACKNOWLEDGE / ACCEPT: The acknowledge function allows local or remote devices to 'accept' and temporarily mute alarms, giving reassurance that help is on its way and making verbal communication easier. If the alarm has not been reset within two minutes the alarm is reactivated.

FAULT MONITORING: NIOS provides network and communications fault reporting to aid maintenance and help ensure reliability. NIOS also reports toilet alarm cabling faults etc. when used in conjunction with our enhanced controllers.

RESET: Our workstation cannot usually be used to reset alarms. Disabled toilet alarms can only be reset at the toilet 'reset unit' to ensure staff attendance in the event of an alarm activation.

EVENT LOG: All alarms and faults are recorded in an event log which can easily be viewed on the workstation.

CONFIGURATION: The workstation is supplied fully configured for your application. If changes are required for maintenance etc. they can be easily effected using the built-in configuration pages.

BMS: The NIOS application offers an output stream for 3rd party systems, enabling our disabled toilet alarms to be incorporated into BMS and other systems.

ABOUT US

We are a UK based company with over 30 years of design and manufacturing experience. All of our products and systems are designed for toughness, reliability, easy installation, simple configuration, straightforward operation and low maintenance. As original manufacturer, all of our product ranges can be customised to suit your application. Including custom engraved panels, additional features and special systems.

Please contact us for further information about our wide range of products and services and find out how we can provide a solution for you.
