

20-WAY LED AFFRAY INDICATOR PANEL

- 20 way alarm indicator panel
- Integral sounder
- Alarm reset and lamp test buttons
- Power status indicators
- Red surface mount enclosure

DESCRIPTION

The Folknoll general alarm series is used to implement a wide range of MoJ alarm systems including general/officer/staff alarms and affray alarms.

The standard 20-way LED affray alarm indicator panel is usually mounted on a surface in a strategic location to annunciate alarms and indicated system status.

Alarms are annunciated by a zone LED and an internal sounder.

Alarms are reset by pressing the **RESET** button on the front panel.

The unit also benefits from power status LEDs and a **LAMP TEST** button.

Units can be combined with a additional LED indicator panels, LCD indicators, alarm logging units, and a range of alarm activators and annunciators to provide a complete site wide alarm system.

The indicator panel is usually connected to and powered from the system controller by a multi-core cable. Screw terminals are provided for all connections.

The affray call point is supplied in a vandal resistant red painted surface mount enclosure with anti-tamper fixings.

Other sizes and colours available on request.
