FOR PRESTIGE SYSTEMS

FOLKNOLL PRESTIGE WALDEN CALL SYSTEMS

Our flexible Prestige warden call / nurse call range combines panic alarms, assistance alarms, door exit alarms, external alarms, intercom, door entry control with local and remote monitoring. Providing peace of mind to residents of care homes, warden controlled homes, nursing homes and other similar establishments.

PS7901 PRESTIGE WARDENS DECT TELEPHONE INTERFACE

The PS9750 Prestige Wardens DECT Telephone Interface allows staff to receive alarms and calls on standard DECT handsets. The handsets can also be used to call speech units and make 'all call' announcements, (providing the warden call system is fitted with an all call unit).

On alarm, front door panel button press etc. the DECT handsets ring. When the call is answered the DECT phone user hears an automated message describing the event and available options. If the event originated from a speech unit the user may talk to the 'caller' to assess the situation. If the event originated from a door entry panel the user can talk to the caller and authorise entry, (if appropriate).

The interface unit has a pass through connector which can be connected to a standard telephone line or local exchange, enabling DECT handsets to make internal or external calls, depending on local exchange configuration etc.

PART NUMBERS

PS9750

Prestige Warden Call DECT Telephone Interface

SPECIFICATIONS

Enclosure: ABS, white
Dimensions: Width: 180 mm, height: 240 mm, depth: 90 mm (approx.)
