

SOUND LEVEL MONITOR

Adjustable trigger level

One-way audio monitoring

LED sound level display

Privacy setting button and status LED

Proven reliable performance

Easy to install and maintain

SOUNDCALL

Our SoundCall voice activated intercom brings peace of mind to residents by alerting operators to unexpected noise levels in remote rooms. Operators can call the room unit to check on the room and occupants at any time. The system offers adjustable trigger levels, an unlimited number of rooms, standard and intercom room units. Ideal for use in residences with vulnerable persons.

ROOM UNITS

Room units continually monitor the sound level within a room. The level is displayed as multicoloured LED bar graph on the front of the unit. If the level exceeds the pre-set trigger level the unit automatically alerts the operators. The operators will be able to hear any sounds in the room and decide how to respond.

STANDARD ROOM UNIT

Our standard room unit has a white painted steel faceplate annotated in black. The trigger level is set using a pair of grey up/down buttons, the current sound level is displayed on a column of LEDs and there is also a privacy button with Privacy status LED. The unit can be mounted on a standard, flush mount, single gang back box.

PRIVACY MODE

If the occupant does not want to be overheard they may select Privacy mode using the buttons on the front of the unit. Privacy mode is indicated by the Privacy status LED.

SOUND LEVEL MONITORING IS NOT AFFECTED BY PRIVACY MODE

**IF THE SOUND LEVEL IN THE ROOM EXCEEDS THE TRIGGER LEVEL THE UNIT WILL STILL INITIATE AN ALERT
ENABLING THE OPERATOR TO HEAR SOUNDS IN THE ROOM**

SPECIFICATIONS

Enclosure:	Mild steel, white painted finish, black annotation
Mounting:	Flush mount in single gang back box
