Adjustable trigger level

One-audio level monitoring

Two-way audio communications

Call, assistance call and reset buttons

Call and assistance call progress LEDs

Privacy setting button and status LED

Proven reliable performance

Easy to install and maintain

## SOUNDCALL

Our SoundCall voice activated intercom brings peace of mind to residents by alerting operators to unexpected noise levels in remote rooms. Operators can call the room unit to check on the room and occupants at any time. The system offers adjustable trigger levels, an unlimited number of rooms, standard and intercom room units. Ideal for use in residences with vulnerable persons.

## ROOM UNITS

Room units continually monitor the sound level within a room. The level is displayed as multicoloured LED bar graph on the front of the unit. If the level exceeds the pre-set trigger level the unit automatically alerts the operators. The operators will be able to hear any sounds in the room and decide how to respond.

## ROOM UNIT WITH INTERCOM

Our Room Unit with Intercom also offers a two-way intercom, allowing voice communication between the occupants of the room and the operators. Room occupants can call for help of assistance by initiating a call or assistance call to an operator. Operators can call and check occupants.

This unit is supplied in a durable wall or desk mount ABS enclosure. The trigger level is set using a dial on the front of the unit, the current sound level is displayed on a column of LEDs, calls are initiated using the green and yellow buttons, call progress is indicated by their associated status LEDs. There is also a privacy button with Privacy status LED.

## PRIVACY MODE

If the occupant does not want to be overheard or called they may select Privacy mode using the buttons on the front of the unit. Privacy mode is indicated by the Privacy status LED.

**SOUND LEVEL MONITORING IS NOT AFFECTED BY PRIVACY MODE**

**IF THE SOUND LEVEL IN THE ROOM EXCEEDS THE TRIGGER LEVEL THE UNIT WILL STILL INITIATE AN ALERT  
ENABLING THE OPERATOR TO HEAR SOUNDS IN THE ROOM**

---

## **SPECIFICATIONS**

Enclosure: ABS, white finish  
Mounting: Wall or desk mounting  
Dimensions: Width: 160mm, height: 220mm (approx.)

## **ABOUT FOLKNOLL**

We are a UK based systems design, manufacturing and installation company. Since 1975 we have been supplying tough, reliable, practical, alarm and control systems for the private and public sectors. All of our products and systems have been designed for easy installation and low maintenance by experienced engineers. As original manufacturers, all of our products and systems can be customised to suit your requirements. We offer custom engraving, special finishes and bespoke features for all of our equipment.

## **GET IN TOUCH**

Please contact us for further information about our wide range of products and services, and find out how we can provide a solution for you.
