WARDEN CALL SYSTEMS

Folknoll offer a range of warden call equipment to provide peace of mind to occupants of warden controlled care homes and sheltered accommodation.

WC7520.01 PULL CORD STAINLESS

One or more pull cords, alarm strips and call points are mounted in strategic locations to enable alarm activation.

The WC7520.01 is a vandal resistant stainless steel, wall or ceiling mount, alarm pull cord unit with a reassurance LED.

To activate an alarm the cord must be pulled and held for at least 0.25 seconds, reducing the risk of accidental activations.

When an alarm is activated the LED is illuminated to provide reassurance that the alarm is activated and help is on its way.

The standard faceplate is made from brush finished stainless steel, alternative finishes are available on request.

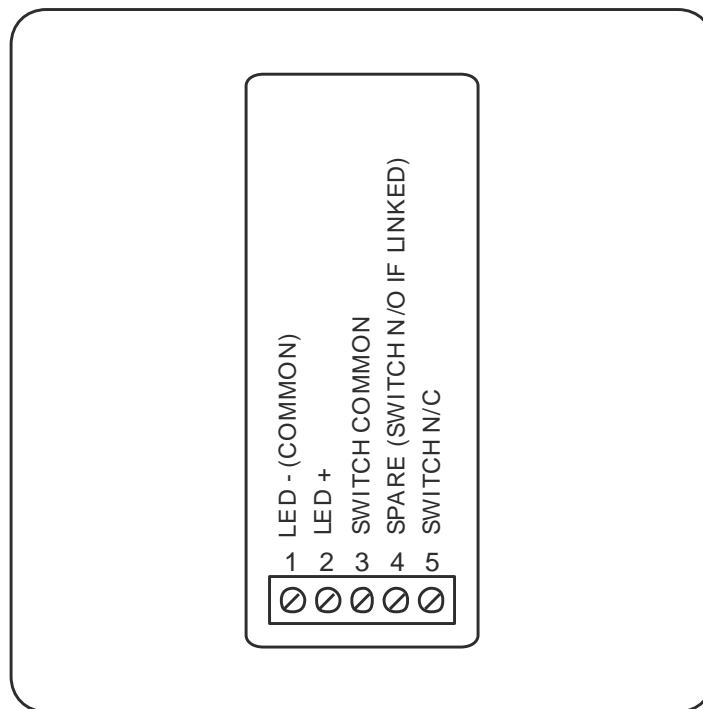

Two pull handles and 2200 mm cord are supplied for high and low level alarm activation.

The unit can be wall or ceiling mounted in a flush or surface mount, 35 mm, single gang back box (not supplied).
