

### VANDAL RESISTANT INTERCOM UNIT

No loudspeaker required

Private conversations

Reduces feedback and crosstalk

Heavy duty hearing aid compatible amplified handset

All metal cradle

Heavy duty hook switch

Armoured cable

Tough 14 gauge stainless steel faceplate

Ideal for prisons, police estate, and other secure counters

## CLOSED VISITS SYSTEM

Folknoll's vandal resistant, voice transfer system, offers tough, cost-effective solutions for closed visits and secure counters. Super tough construction, armoured cables and stainless steel faceplates makes our system suitable for **PRISON, POLICE, COURTS, CUSTODIAL FACILITIES**. Our large range of handsets, power supplies and other devices enables us to construct a system to suit your requirements.

## CV 8000-101 VANDAL RESISTANT HANDSET

Our CV 8000-101 Vandal Resistant Handset is a tough, proven, flush or surface mount, intercom handset suitable for closed visits systems, secure counter systems and similar voice transfer applications.

## PRIVATE CONVERSATIONS

Using a handset in place of a loudspeaker and microphone makes conversations more private, which may be desirable or even essential in certain situations.

## BETTER PERFORMANCE

Voice transfer intercom units are often installed in close proximity, leading to feedback and crosstalk issues. Replacing speakers and microphones with handsets reduces these effects, improving the performance of the system and reducing installation problems.

## NOISY LOCATIONS

Traditional speaker and microphone intercom systems can be difficult to use in noisy environments. The loudspeaker can be hard to hear, the microphone picks up and mixes extraneous noise with the speech, conversations can become shouting matches and very public. Using a handset is often a much better solution in noisy locations.

## CONSTRUCTION

The unit comprises a heavy duty black hearing aid compatible amplified handset, connected to the base unit, by a vandal resistant armoured cable. The base unit has a tough 14-gauge stainless steel faceplate, fitted with an all metal cradle and heavy duty hook switch.

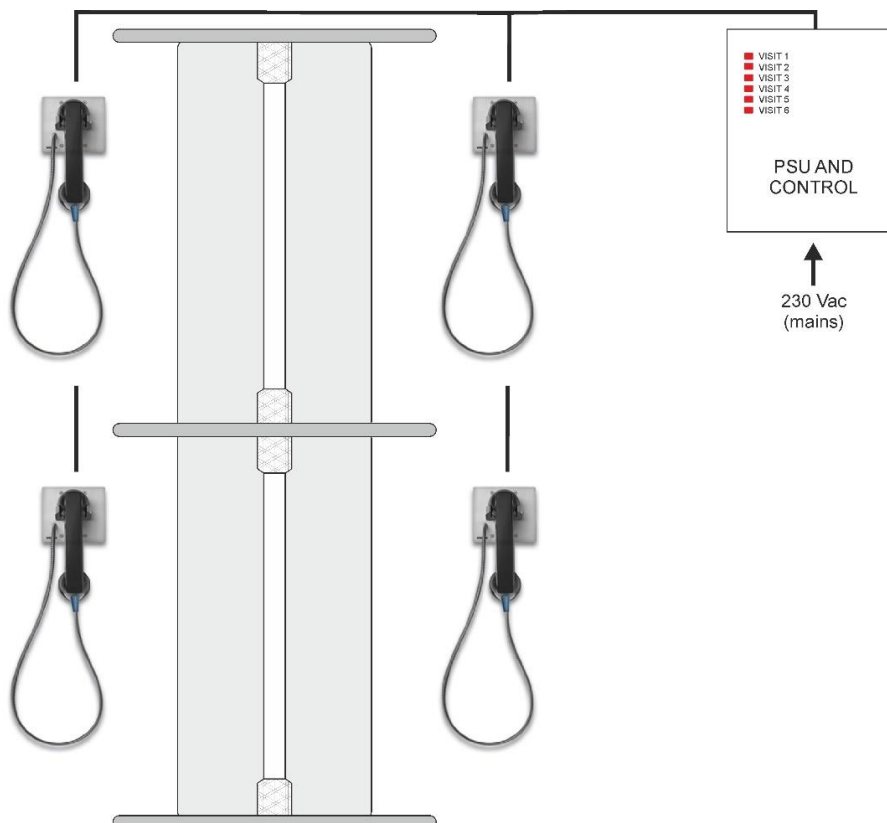

## APPLICATIONS

This unit is ideal for use with our multi-channel closed visits voice transfer systems. It is currently in use with HMPS. The handset is also suitable for secure counters in noisy and high risk locations where a private conversation is desirable. E.g. night counters, pharmacies, payment windows.

## SPECIFICATIONS

Faceplate:	Stainless steel, 14 gauge
Dimensions (base):	116mm x 115mm x 70mm (approx.)
Mounting:	Flush or surface back box available
Environmental:	0°C to 32°C (32°F to 90°F) with 5% to 95% noncondensing humidity
Connections:	RJ14 jack
Power:	Line powered
