EMERGENCY ASSISTANCE ALARMS

Folknoll emergency assistance alarm systems offer cost-effective, vandal resistant, **BS 8300-2** and **DOCUMENT M** compatible solutions built from standard and bespoke units. Our alarms can be combined with disabled refuge EVCS and other systems. Ideal for **SHOPS, OFFICES, HOTELS** and other **PUBLIC SPACES**.

PULL CORD UNITS

Pull cords, alarm strips and call points are used to call for assistance in emergency. The units are mounted in strategic locations in accordance with current standards, enabling distressed persons to activate alarms. Depending on the system configuration, beacons, sounders and remote monitoring units will be used to alert staff and others to respond to incidents.

DT7520.01: PULL CORD STAINLESS

Our DT7520.01 Pull Cord Stainless is a tough stainless steel, alarm pull cord unit with a built-in reassurance LED.

PULL CORD HANDLES

The unit is usually supplied with 3000mm cord and two pull handles offering high-level and low-level activation points. The handles can be located anywhere along the cord to comply with local regulations, specifications and requirements. Alternative cord lengths and additional pull handles are available on request.

REASSURANCE LED

The reassurance LED mimics the operation of the overdoor beacon to indicate the state of the local alarm. Giving users local reassurance that the alarm has been activated, etc. The exact behaviour of this LED will depend on the type of alarm control system used. Typically, the LED flashes in the alarm activated state and is illuminated continuously in the alarm acknowledged state.

FACEPLATE / ENCLOSURE

The standard faceplate is made from brushed finish stainless steel, alternative finishes are available on request.
MOUNTING

The unit is designed for mounting in a standard >35mm, single gang, UK back box. Anti-tamper fixings are available on request.
