INTELLIGENT AFFRAY ALARM

Folknoll strip switch alarm products offer fault monitoring and strip illumination for multiple strip switch systems. Ideal for use in security and care alarm systems. Strip illumination attracts attention to alarm system, indicates system is working, acts as deterrent, provides reassurance. Fault monitoring: gives confidence that when a strip is pressed the alarm will be raised. We offer a choice of standard, illuminated, IP65 strip switches, a range of colours and fixings, standard and customised indicator panels, custom engraving and alarm messages, control for up to 150 strips, outputs for additional sounders beacons etc., options for integration with custody suite and other security systems.

IAA 9008-202 LED INDICATOR PANEL

The IAA 9008-202 LED Indicator Panel alerts staff to alarm activation and system faults.

On alarm or fault the unit sounds and illuminates an LED to indicate the alarm source. The panel has a mute button to silence the sounder. A keyed reset switch can be fitted to prevent unauthorised resets.

The unit is designed for use in public areas, with a stainless steel faceplate, vandal resistant fittings and anti-tamper fixings. Other finishes and alternative engraving is available on request. This unit can be supplied with a flush or surface back box.
Suitable for custodial, security, care, disability alarms and similar applications
