

## SOUND LEVEL MONITORING MASTER STATION

Adjustable trigger level

One-way audio monitoring

Intercom requires intercom room units

Call logging

Pager interface

Proven reliable performance

Easy to install and maintain

## SOUNDCALL

Our SoundCall voice activated intercom brings peace of mind to residents by alerting operators to unexpected noise levels in remote rooms. Operators can call the room unit to check on the room and occupants at any time. The system offers adjustable trigger levels, an unlimited number of rooms, standard and intercom room units. Ideal for use in residences with vulnerable persons.

## ROOM UNITS

Room units continually monitor the sound level within a room. The level is displayed as multicoloured LED bar graph on the front of the unit. If the level exceeds the pre-set trigger level the unit automatically alerts the operators. The operators will be able to hear any sounds in the room and decide how to respond.

## MASTER PANEL

Our Master Panel receives calls and sound activated alerts from SoundCall room units. The calling device is identified displayed on an LCD. Master panels can also call room units to contact or check on room occupants.

The master panel has a built-in microphone and speaker, a numeric keyboard for dialling room units, LCDs showing current and pending calls, and six control buttons.

This unit has a robust stainless steel faceplate and is supplied with a steel wall or desk mounted steel enclosure.

## PUSH TO TALK

SoundCall is a push-to-talk system, operators control the direction of speech, allowing operators to speak to the occupants even in noisy situations. Operators can discuss how to respond to an incident without being heard by the occupant.

## PRIVACY MODE

If the occupant does not want to be overheard or called they may select Privacy mode using the buttons on the front of the unit. Privacy mode is indicated by the Privacy status LED.

**SOUND LEVEL MONITORING IS NOT AFFECTED BY PRIVACY MODE**

**IF THE SOUND LEVEL IN THE ROOM EXCEEDS THE TRIGGER LEVEL THE UNIT WILL STILL INITIATE AN ALERT  
ENABLING THE OPERATOR TO HEAR SOUNDS IN THE ROOM**

---

## **SPECIFICATIONS**

Faceplate:	Stainless steel, brushed finished, black annotation
Enclosure:	Mild steel
Mounting:	Wall or desk mounting
Dimensions:	Width: 345mm, height: 195mm (approx.)

## **ABOUT FOLKNOLL**

We are a UK based systems design, manufacturing and installation company. Since 1975 we have been supplying tough, reliable, practical, alarm and control systems for the private and public sectors. All of our products and systems have been designed for easy installation and low maintenance by experienced engineers. As original manufacturers, all of our products and systems can be customised to suit your requirements. We offer custom engraving, special finishes and bespoke features for all of our equipment.

## **GET IN TOUCH**

Please contact us for further information about our wide range of products and services, and find out how we can provide a solution for you.
