Can be daisy chained for multiple alarm activation points

Tough, stainless steel, construction

Anti-tamper fixings available

Flush mount - fits standard UK, 35mm single gang back box

Ideal for public places, hospitals, hotels, etc.

WARDEN CALL SYSTEMS

Warden call systems enable residents, visitors and staff to obtain assistance in the event of emergency or other contingency. They may also be used to warn staff when associated alarms are activated e.g., exit door, water level, smoke, etc. If appropriate, door entry intercom with remote door release can be incorporated into staff and lower dependency units. For those times when your site has no local staff available our systems can be configured to report alarms and other events to remote operators or control rooms.

FOLKNOLL WILL DESIGN AND SUPPLY FULLY TESTED SYSTEMS OR INDIVIDUAL COMPONENTS. PLEASE CONTACT OUR TEAM OF ENGINEERS TO DISCUSS YOUR REQUIREMENTS.

PULL CORD UNITS

Pull cords, alarm strips and call points are used to call for assistance in emergency. The units are mounted in strategic locations in accordance with current standards, enabling distressed persons to activate alarms. Depending on the system configuration, beacons, sounders and remote monitoring units will be used to alert staff and others to respond to incidents.

WC7520.01: PULL CORD STAINLESS

Our WC7520.01 Pull Cord Stainless is a tough stainless steel, alarm pull cord unit with a built-in reassurance LED.

PULL CORD HANDLES

The unit is usually supplied with 3000mm cord and two pull handles offering high-level and low-level activation points. The handles can be located anywhere along the cord to comply with local regulations, specifications and requirements. Alternative cord lengths and additional pull handles are available on request.

REASSURANCE LED

The reassurance LED indicates the state of the local emergency alarm. The exact behaviour of this LED depends on the type of alarm control system used. Typically, the LED flashes in the alarm activated state and is illuminated continuously in the alarm acknowledged state.

FACEPLATE / ENCLOSURE

The standard faceplate is made from brushed finish stainless steel. Alternative finishes are available on request.

MOUNTING

The unit is designed for mounting in a standard UK, 35mm, single gang back box (not supplied).
